RiskIQ Overview

RiskIQ is the leader in Attack Surface Management (ASM), providing the most comprehensive discovery, intelligence, and mitigation of threats associated with an organization’s digital presence. With RiskIQ, organizations can understand their digital attack surface, expedite investigations, assess risk, and take actions to protect their business, brand, and customers from external threats.

The company’s Attack Surface Management platform combines advanced internet reconnaissance and analytics to provide unified insight and control for exploits, attacks, and adversaries across web, social, and mobile channels. Beyond superior intelligence, RiskIQ’s SaaS-based solution suite allows different security teams to more efficiently identify, triage, monitor, and resolve exposures outside the firewall—taking advantage of greater collaboration, automation, and integration.

RiskIQ’s solutions are easy to deploy, have broad application, and yield accelerated time to value. As a result, RiskIQ has been chosen by more than 80,000 security analysts and over 300 enterprises around the world.

Digital Defense Challenge

Organizations have embraced web, social, and mobile mechanisms to enhance their brand stickiness, to increase customer engagement, and to facilitate employee and market interaction. Cybercriminals have gone digital, too. Today, more than 75% of attacks originate outside the firewall.

Unfortunately, today’s diverse and dynamic cyber threats circumvent traditional network and endpoint security tools and place an enormous burden on information security organizations. In addition to securing the network and the assets and data that reside within it, security teams now face questions of:

- Where are, how exposed, and how compliant are my internet-facing assets and digital brand?
- How do external exploits, attackers, and adversary infrastructure relate to internally discovered suspicious activity, security events, and incidents?
- What cyber threats are attacking my business and can I manage the risk, take down external threat, and minimize operational impact?
- To what extent are other entities abusing my brand and customers?
- Is there leaked personal data on the internet that could be used to target and compromise my organisation’s executives?

RiskIQ Answer

While threat intelligence feeds can enrich internal event data, organizations need an end-to-end approach offering a more systematic, automated means to efficiently discover, triage, respond, and preempt external digital threats.

RiskIQ combines advanced internet reconnaissance and analytics, an integrated tool set, and interoperability to automate insight, collaboration and mitigation to address all the above challenges—packaged in a SaaS application suite that optimizes different tasks across security teams.
RiskIQ Overview

Our Customers are Tackling Digital Threats

RiskIQ is trusted by Fortune 500 companies, security-savvy enterprises, and popular brands across industries, as well as a growing community of thousands of security professionals.

Business Value

Reduce operational and reputation risk
Find, monitor, and address risks in your digital attack surface and business exposure.

Optimize resources
Increase productivity through automated intelligence, proactive analytics, and mitigation workflow, as well as consolidate toolsets.

Reduce MTTD/MTTR
Decrease threat discovery, triage, and resolution time.

Fortify compliance
Proactively identify unsanctioned and malicious brand use, unknown and insufficient external system hygiene, and at risk partners.

Products

- **RiskIQ Digital Footprint**: Continuously discover an inventory of your externally-facing digital assets and manage risks associated with your attack surface.
- **RiskIQ JavaScript Threats Module**: Identify and remediate malicious JavaScript Injection, whether direct or via a third-party service, protecting customer credit card and personal information from skimming exploits.
- **RiskIQ PassiveTotal**: A threat analysis platform that unifies internet data sets, empowering security teams to accelerate the investigation and elimination of threats.
- **RiskIQ External Threats**: Automate the detection, monitoring, and remediation of digital threats posed by malicious actors to your organization, employees, and customers.
- **RiskIQ SIS™ (Security Intelligence Services)**: Enrich analytics with our internet data sets.
- **RiskIQ Executive Guardian**: Continuously detects sensitive and threatening content across the web related to an organization’s executives.

Capabilities

- **Cross-channel intelligence**: Extensive internet data sets covering public internet, deep web, brand abuse, phishing, social impersonation, and mobile telemetrics.
- **Virtual user technology**: Crawlers that emulate users to capture session details, content, relationships, and what’s happening under the hood in the browser.
- **Proactive analytics**: Correlation models, data science, and research to identify and monitor new and active threat activities, adversaries, and their infrastructure.
- **Automated footprints**: Auto-generates a connected, internet-facing asset map across large and complex entities, and offers dynamic visual aids and insights.
- **Streamlined analysis**: Intuitive console with correlated data, insights, and derived analytics that expedites investigations and uncovers exploits and attackers.
- **PII/GDPR analytics**: Actively identify, assess, and monitor web assets collecting personal data.
- **Projects**: Designate and group indicators of compromise (IOC), threat artifacts, external infrastructure elements to share, monitor, update, and alert on change.
- **Integrated mitigation**: Built-in blocking, in-app enforcement, and takedown workflows resolve infringements, malicious activity, and attacker infrastructure.
- **Interoperability**: Ready-built integrations and rich API brings data and insights into your existing portfolio; SIEM, VA, GRC, Service Desk, Security Automation.
